650 Series VoIP Integrated Communications System

Jacques offer a range of accessory products to support the 650 Series VoIP Integrated Communications System and can provide complete system solutions for almost any application.

POWER over ETHERNET ADAPTOR (PoE)

Jacques **Power over Ethernet (PoE) Adapters** are passive devices that provide individually fused 24 V d.c. supply to all Jacques VoIP equipment. PoE simplifies installation and eliminates the need to run separate power and LAN cables to each access point. Jacques PoE solutions significantly reduce cabling and outlet requirements therefore reducing installation costs. PoE adaptors are available in 1, 6, 12 and 24 ports.

Product Code – 1 port - 50997
6 port - 50961
12 port - 51059
24 port - 50925

EXCHANGE LINE INTERFACE (ELI-3B1)

The Jacques **Exchange Line Interface (ELI-3B1)** is an interface unit which connects the Jacques VoIP System to PSTN or PABX telephone networks. For example, as part of a building application, operators can dial telephone numbers from any Jacques Master Intercom Station. Alternatively any Jacques Slave Intercom Station can dial out to an after hours telephone via the ELI unit.

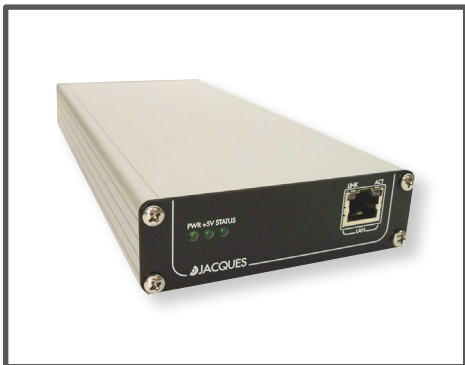

Product Code – 51124

UNIVERSAL AUDIO INTERFACE (UAI-3B1)

The Jacques **Universal Audio Interface (UAI)** provides a means to integrate the 650 Series VoIP Integrated Communication System with the 550 Series Intercom and PA System. It's ideal for installations where a Jacques 550 series intercom and PA system has been commissioned, and needs expanding/upgrading. The unit can also interface between the 650 Series VoIP Integrated Communications System and an analogue audio device. Jacques software configurations enable the UAI to be used as a radio interface, PA controller, relay controller and streaming audio converter.

Product Code - UAI 3B1 - 51196
UAI 3E1 - 51195

RADIO INTERFACE UNIT (RIU-3B1)

The Jacques **Radio Interface Unit (RIU-3B1)** provides an interface enabling the Jacques VoIP System to communicate with a commercial two way radio system. Bidirectional voice and Press-to-Talk (PTT) are controlled by the master intercom station allowing operators to communicate with personnel outside of the building complex via the two way radio system.

Product Code – 51125

650 Series VoIP Integrated Communications System

Jacques offer a range of accessory products to support the 650 Series VoIP Integrated Communications System and can provide complete system solutions for almost any application.

LIFT INTERCOM STATION (LIS-3B1)

The Jacques **Lift Intercom Station (LIS-3B1)** is a module which facilitates the integration of a Jacques 650 Series VoIP Intercom Station into an existing lift panel. Provision is made on the LIS-3B1 for the connection of a remote speaker, microphone, call buttons, LED indicators and relay outputs.

Product Code – 51173

CABLE EXTENDER MODULE (JCE-8B1)

The Jacques **Cable Extender (JCE)** module provides a convenient method of extending the connection distance between a Jacques VoIP Intercom Station and a network port. The cable extender module overcomes the 100 metre maximum cabling length limitation for CAT5/6 type Ethernet connected devices. A pair of JCE's may be used to extend a wired Ethernet link up to 2 kms, using just a single CAT5/6 pair or a standard telephone cable pair. Cable Extender Modules are available in box or euro card versions.

Product Code – JCE-8B1 - 51161
JCE-8E1 - 51227

SPEAKER/MICROPHONE INTERFACE (SMI-3B1)

The **Speaker Microphone Interface (SMI)** provides the connection of speaker, microphone and handset to the Jacques 650 series compatible master intercom station. Used in conjunction with either a Jacques PC 650 Master or with any 3rd party intercom master, the module can interface both a desk mounted microphone/speaker combination or a handset/headset combination, with the capability for both to be used simultaneously.

Product Code – 51215

SPEAKER (SVR-100) & CEILING SPEAKER HOUSING

The Jacques **SVR-100 Speaker** is a vandal and water resistant flush mounted speaker, which provides optimum audio quality in areas requiring a tamper and water protected speaker. 2mm thick marine grade 316 type stainless steel is used for the front grill with steel baffle plates providing protection for the speaker drive unit. Both 5 watt and 15 watt, 100 volt line versions are available with multitap transformers for optimum power settings. Where flush mounting is not possible the Jacques **CSH-1 Ceiling Speaker Housing** is an ideal aesthetically pleasing surface mount enclosure, specifically designed for the SVR-100 speaker. It is particularly useful for mounting the SVR-100 speaker to concrete ceilings.

Product Code – SVR-100 - 50909
CSH-1 - 50620
